## Join the Ohu Aligned Organisations Network

Ohu Development is a company set up to support communities to build collectively owned assets, such as co-housing, co-working spaces, land trusts and collectively owned solar grids. We do this by supporting teams to work through each stage of the development process. We are building a network of organisations who would like to offer their skills to support communities to collectively own assets.

Ohu Development is a small team and we do not offer all the services required to support a project from ideation through to being fully realised, so we are creating a network of aligned organisations to build teams that can support projects throughout their development.

## Benefits of the Ohu Aligned Organisations Network

We believe communities grow stronger when they have sustainable incomes to support themselves. If you share this belief and you would like to join the early development of this network by offering your skills, please send us the following:

**Purpose** - a short sentence that states your organisation's purpose

**Skills** - a short statement about what services your organisation provides

**Details** - your website, logo and the best person to contact

**Permission** - we will identify you as an aligned organisation on our [website](#) upon receiving the above details

There is no cost to join the network, however a small membership fee may be charged in the future should Ohu incur costs to maintain the network.

As projects come to us, we will share your details with the project leads; they may get in touch with you to request quotes for your services.

## The future of Ohu Aligned Organisations Network

As the network grows it is possible it will evolve into a more sophisticated resource. When that happens, we will keep you informed and get in touch if we need further information. We are doing this to draw together like-minded people. Our hope is that you will not only connect with us, but that you may find others you can connect with as well. This is, why we are sharing the organisation on our website. We are also in the early planning stages of a hui to bring together like minded organisations, we will keep you posted as to dates and details.

If you have any other suggestions about how we can create stronger connections across the diverse development and community building industry please get in touch.
